Instructions

1. On Raspberry Pi terminal Run the following commands one by one:

   sudo apt-get update

   sudo apt-get upgrade

   sudo apt-get install portaudio19-dev

   sudo pip install pyaudio

   sudo pip install pydrive

2. Extract Code.zip and copy it to Raspberry Pi Desktop
3. Open Code Folder and run "main.py".
4. To automatically run the script on startup. Read the "Auto run on boot guide"
5. Instead of typing *sudo /home/pi/Desktop/1.7.py*

   Type **sudo /home/pi/Desktop/Code/main.py**

   Follow the Guide then.

6. You are good to go now.
